

# 2024.11.05 Formal Meeting for Report

---

## Outline:

### Before Online Meeting Prepare:

Plan completeness situation

User case diagram

Questionnaires

Sequence Diagram (Zhihao Cao, Zihan Zhou, Changhao Huang)

Prototype (Peini She, Zixin Ding, Jinghao Liu)

Prototype Interface Conception

## Q&A:

### Undo List

### Next Week Work and Important Point

Envisioned in Timeline:

Tasks for next week

## Plan

- **Time:** 2024.11.1 14:00 – 16:00 (Maximum Time)
- **Location:** 3F – Group Study Room 10 (Library)
- **Links:** Online meeting links--[Teams](#)
- **Chairperson:** Zhihao Cao
- **Secretary:** Changhao Huang
- **Information Integrator:** Zixin Ding
- **Attendance:** Qian Zhang (Supervisor), Zhihao Cao, Changhao Huang, Peini She, Zixin Ding, Zihan Zhou, Jinghao Liu
- **Apologies of Absentee:** None

# Outline:

1. last week work report (user case, activity diagram and questionnaires) ----- check by supervisor
  - a. use case diagram
  - b. activity diagram
  - c. questionnaire
  - d. sequence diagram
  - e. prototype
2. Q&A
3. details of report (write what? how write(use latex?) ? requirement?)
4. next week work plan

## Before Online Meeting Prepare:

### Plan completeness situation

| Person(s)  | Assignment              | DDL        | Degree | Status |
|--|-------------------------|------------|--------|--------|
| Zixin Ding, Changhao Huang<br>Zhihao Cao             | Finish Use Case Diagram | 2024.10.24 | urgent | Finish |
| Zhihao Cao, Zixin Ding, Peini<br>She, Changhao Huang | Activity Diagram        | 2024.10.25 | urgent | Finish |
| Zihan Zhou, Jinghao Liu                              | Questionare             | 2024.10.25 | urgent | Finish |

| Person(s) | Assignment | DDL | Status | Result |
|-----------|------------|-----|--------|--------|
|-----------|------------|-----|--------|--------|

|                                 |   |           |        |   |
|---------------------------------|---|-----------|--------|---|
| Peini SHE<br>(prototype leader) | Prototype : Try on  | 2024.11.8 | finish | <a href="https://www.figma.com/proto/LQUS6de4UhTJhda2CwG3pM/Figma-basics?node-id=601-9&amp;t=tHGS4V6OYOmxbLr3-1">https://www.figma.com/proto/LQUS6de4UhTJhda2CwG3pM/Figma-basics?node-id=601-9&amp;t=tHGS4V6OYOmxbLr3-1</a>           |
| Zixin Ding                      | Prototype: Browse, View Pages                               | 2024.11.8 | finish | <a href="https://www.figma.com/design/bHZVrSwxAhunPSjnd82ci0/Browse?node-id=601-9&amp;m=dev&amp;t=AXZZqKzj5gFdV2hW-1">https://www.figma.com/design/bHZVrSwxAhunPSjnd82ci0/Browse?node-id=601-9&amp;m=dev&amp;t=AXZZqKzj5gFdV2hW-1</a> |
| Jinghao Liu                     | Prototype: Login  | 2024.11.8 | finish |   |
| Zhihao Cao(sequence leader)     | Sequence: view clothing items                               | 2024.11.8 | finish |   |
| Zihan Zhou                      | Sequence: add an image<br>save favourite outfit combination | 2024.11.8 | finish |   |
| Changhao Huang                  | Sequence: sign in ,sign up                                  | 2024.11.8 | finish |   |

## User case diagram

答电脑上时记得所有首字母大写

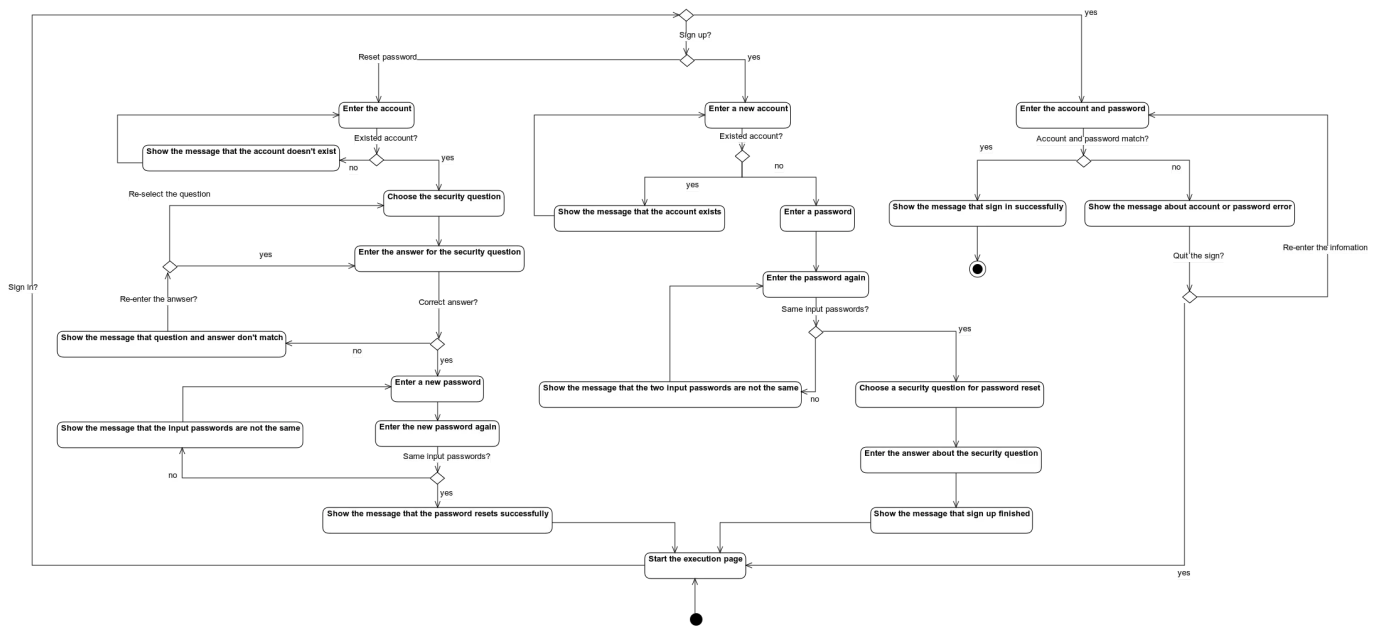

4

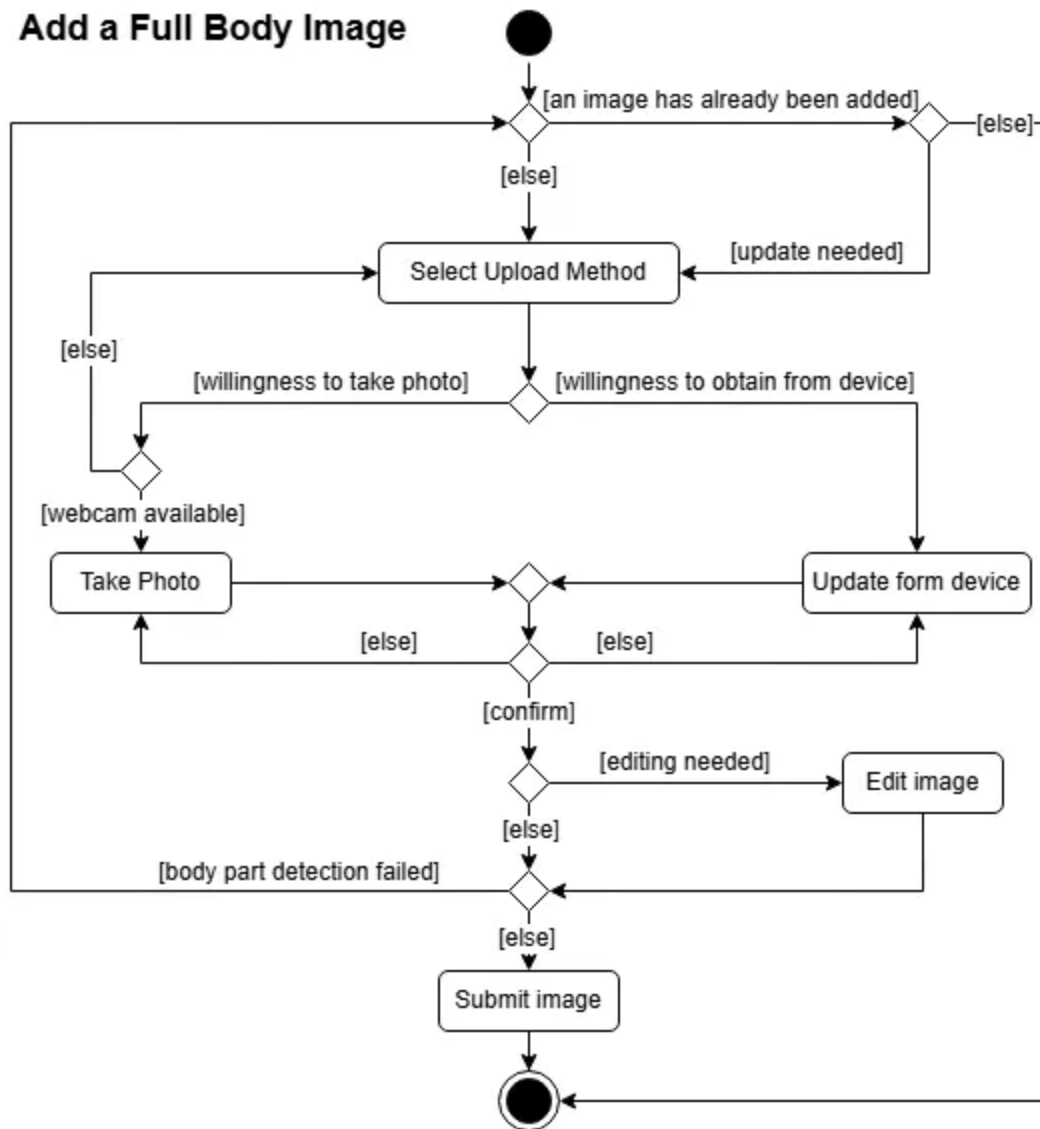

Code Version 1 (by Changhao Huang)

## Activity diagram

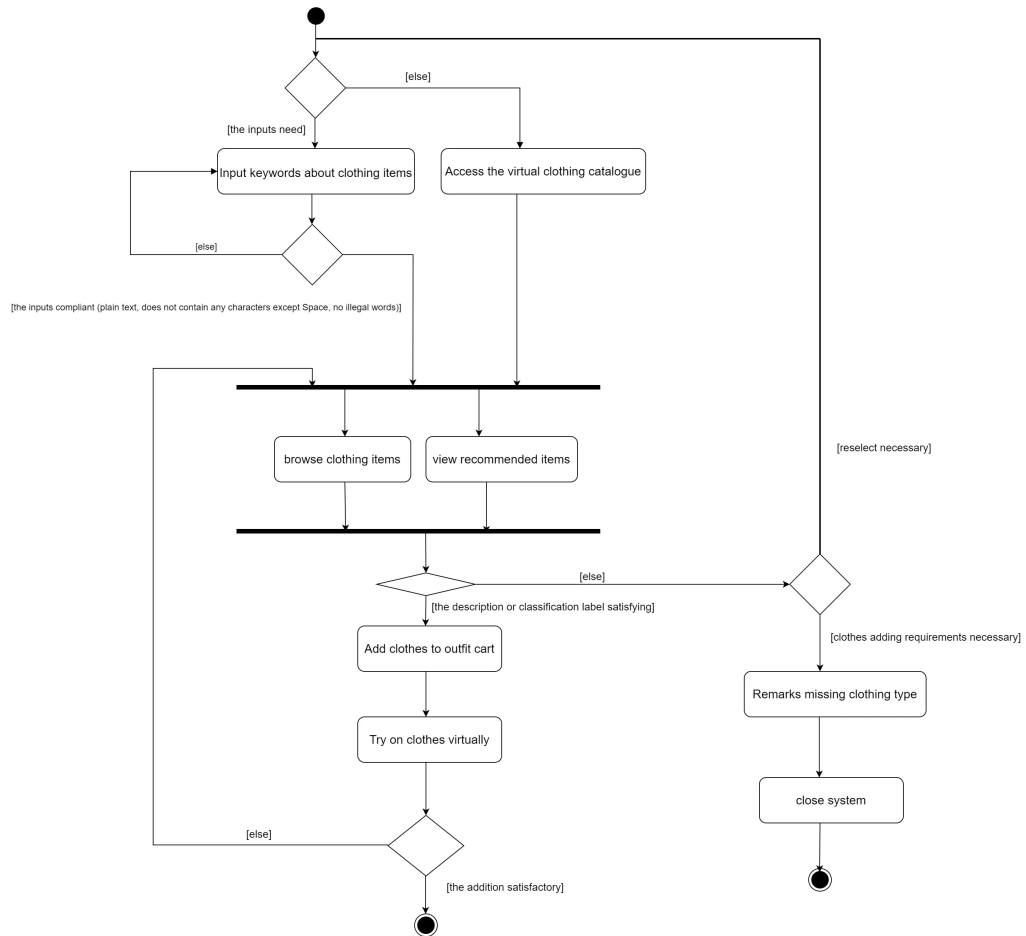

Changhao Huang (sign in/sign up)

## Add a Full Body Image

Zixin Ding (add an image)

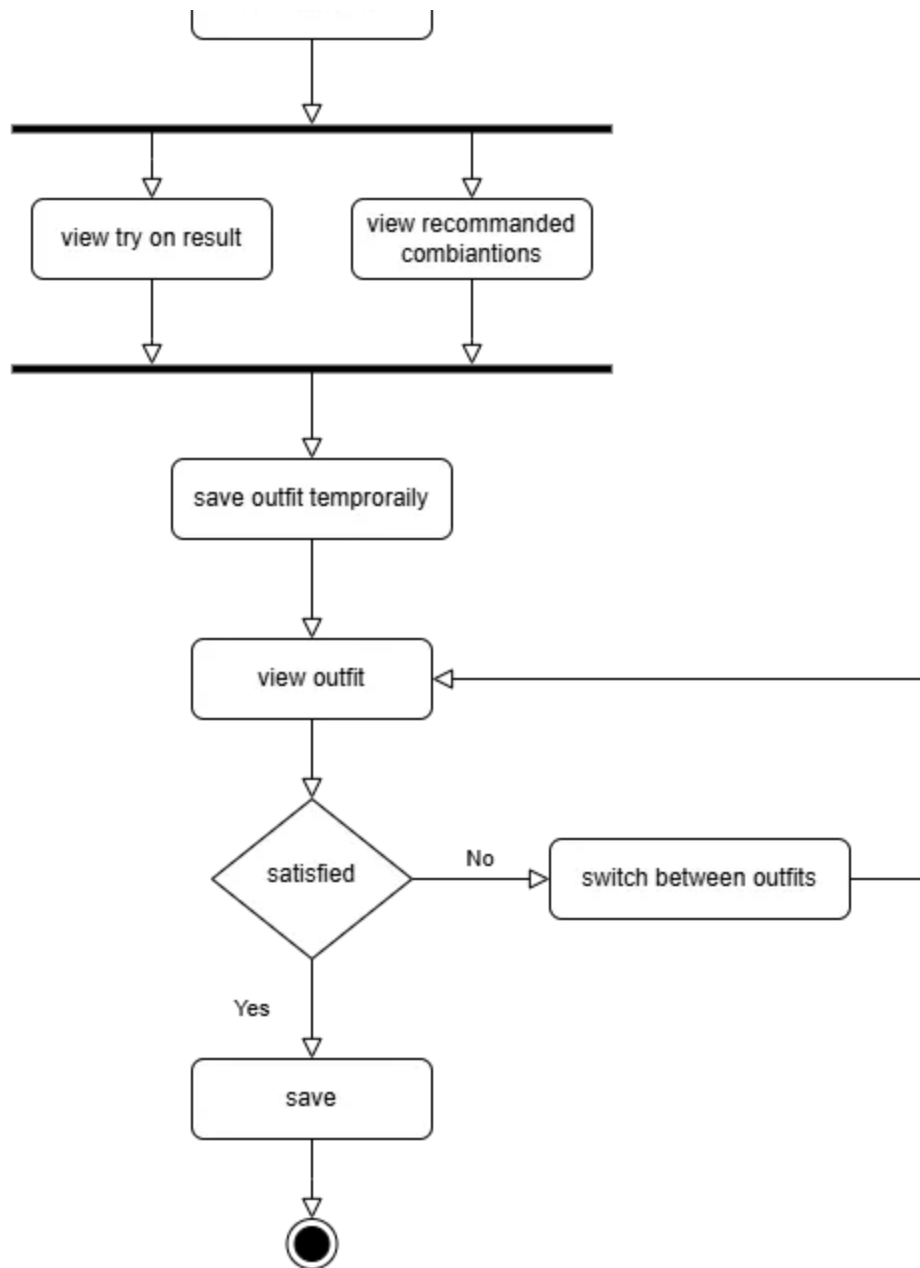

# view clothing items

Zhihao Cao (view clothing items)

Peini She (Try on and Save)

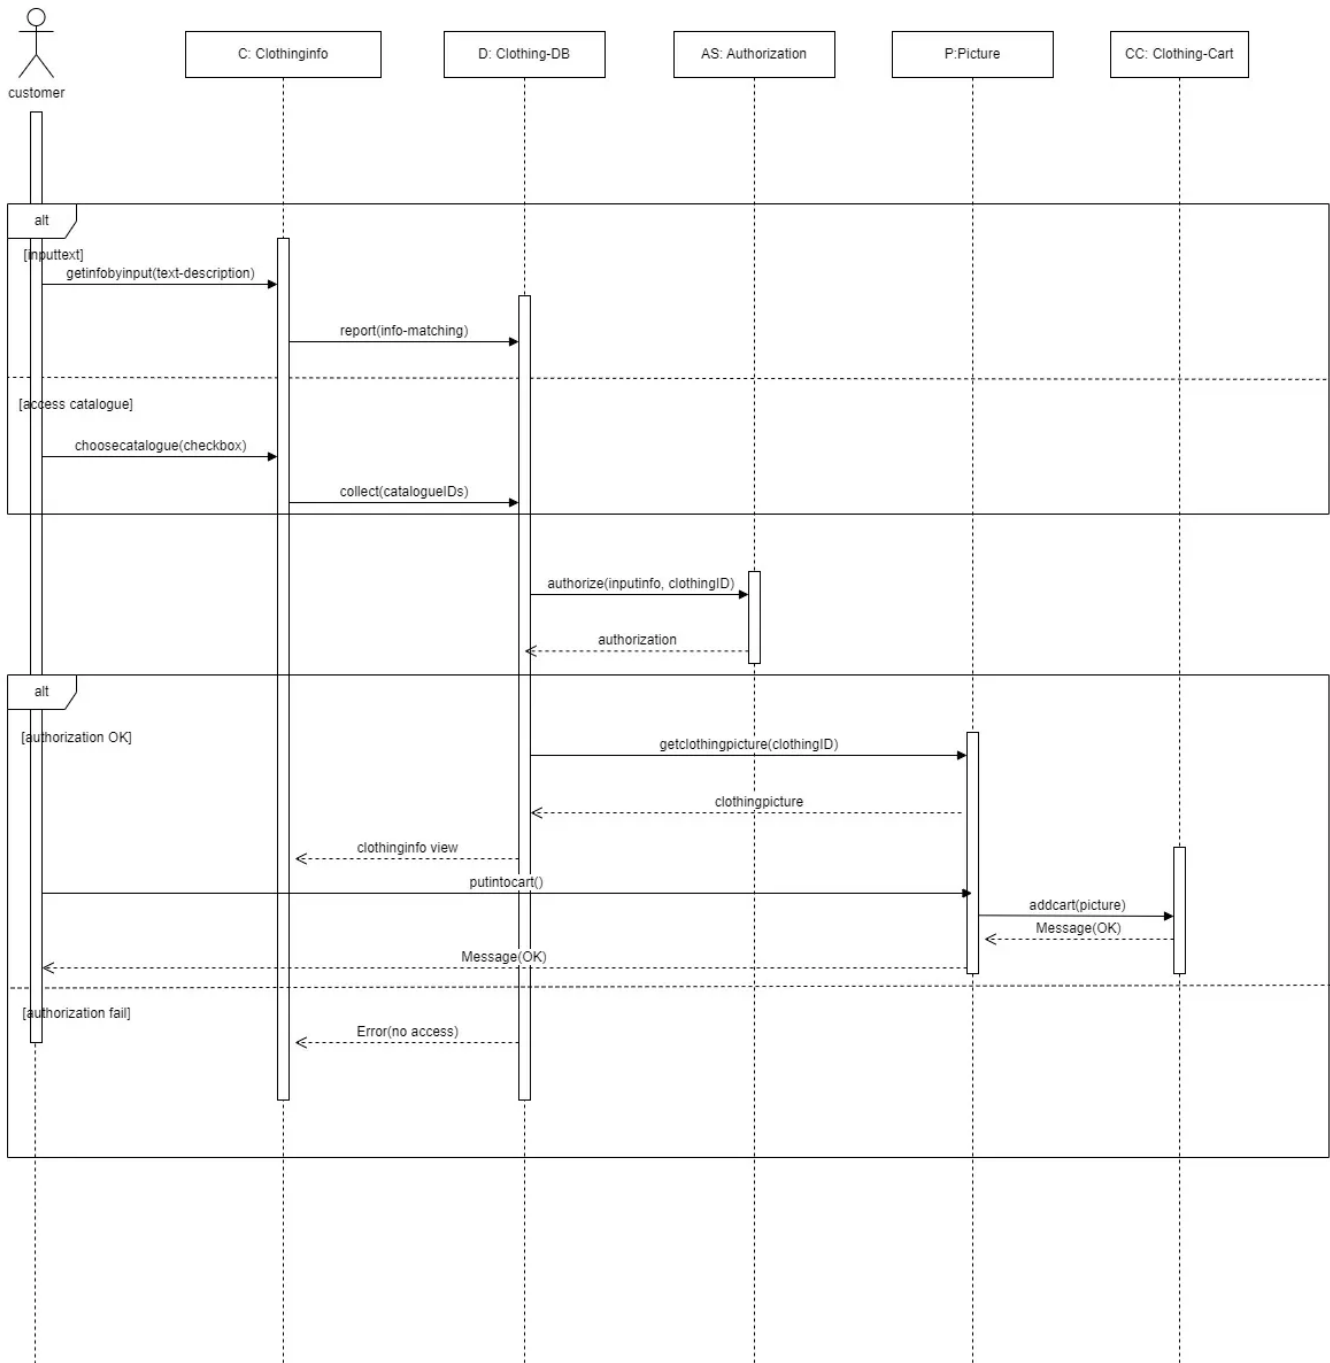

## Questionnaires

- Original version, may change

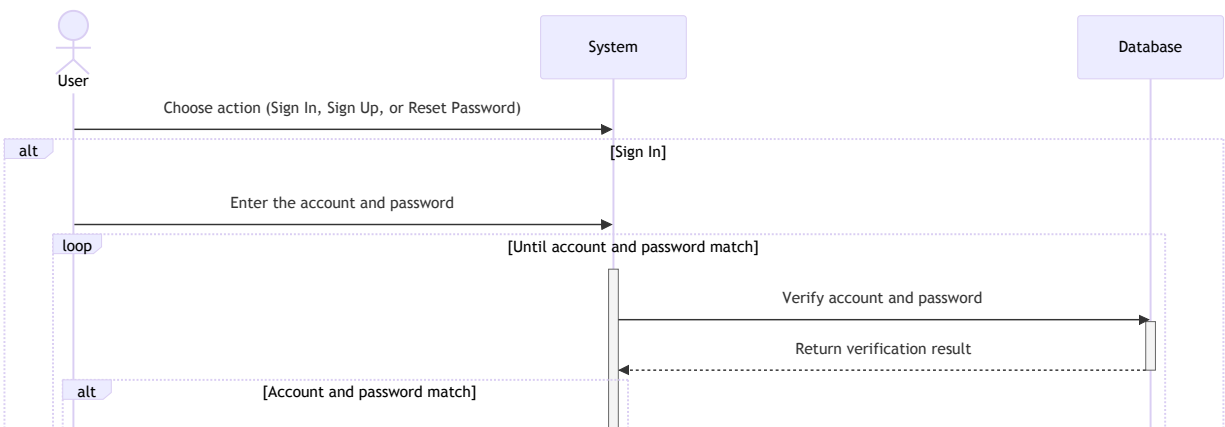

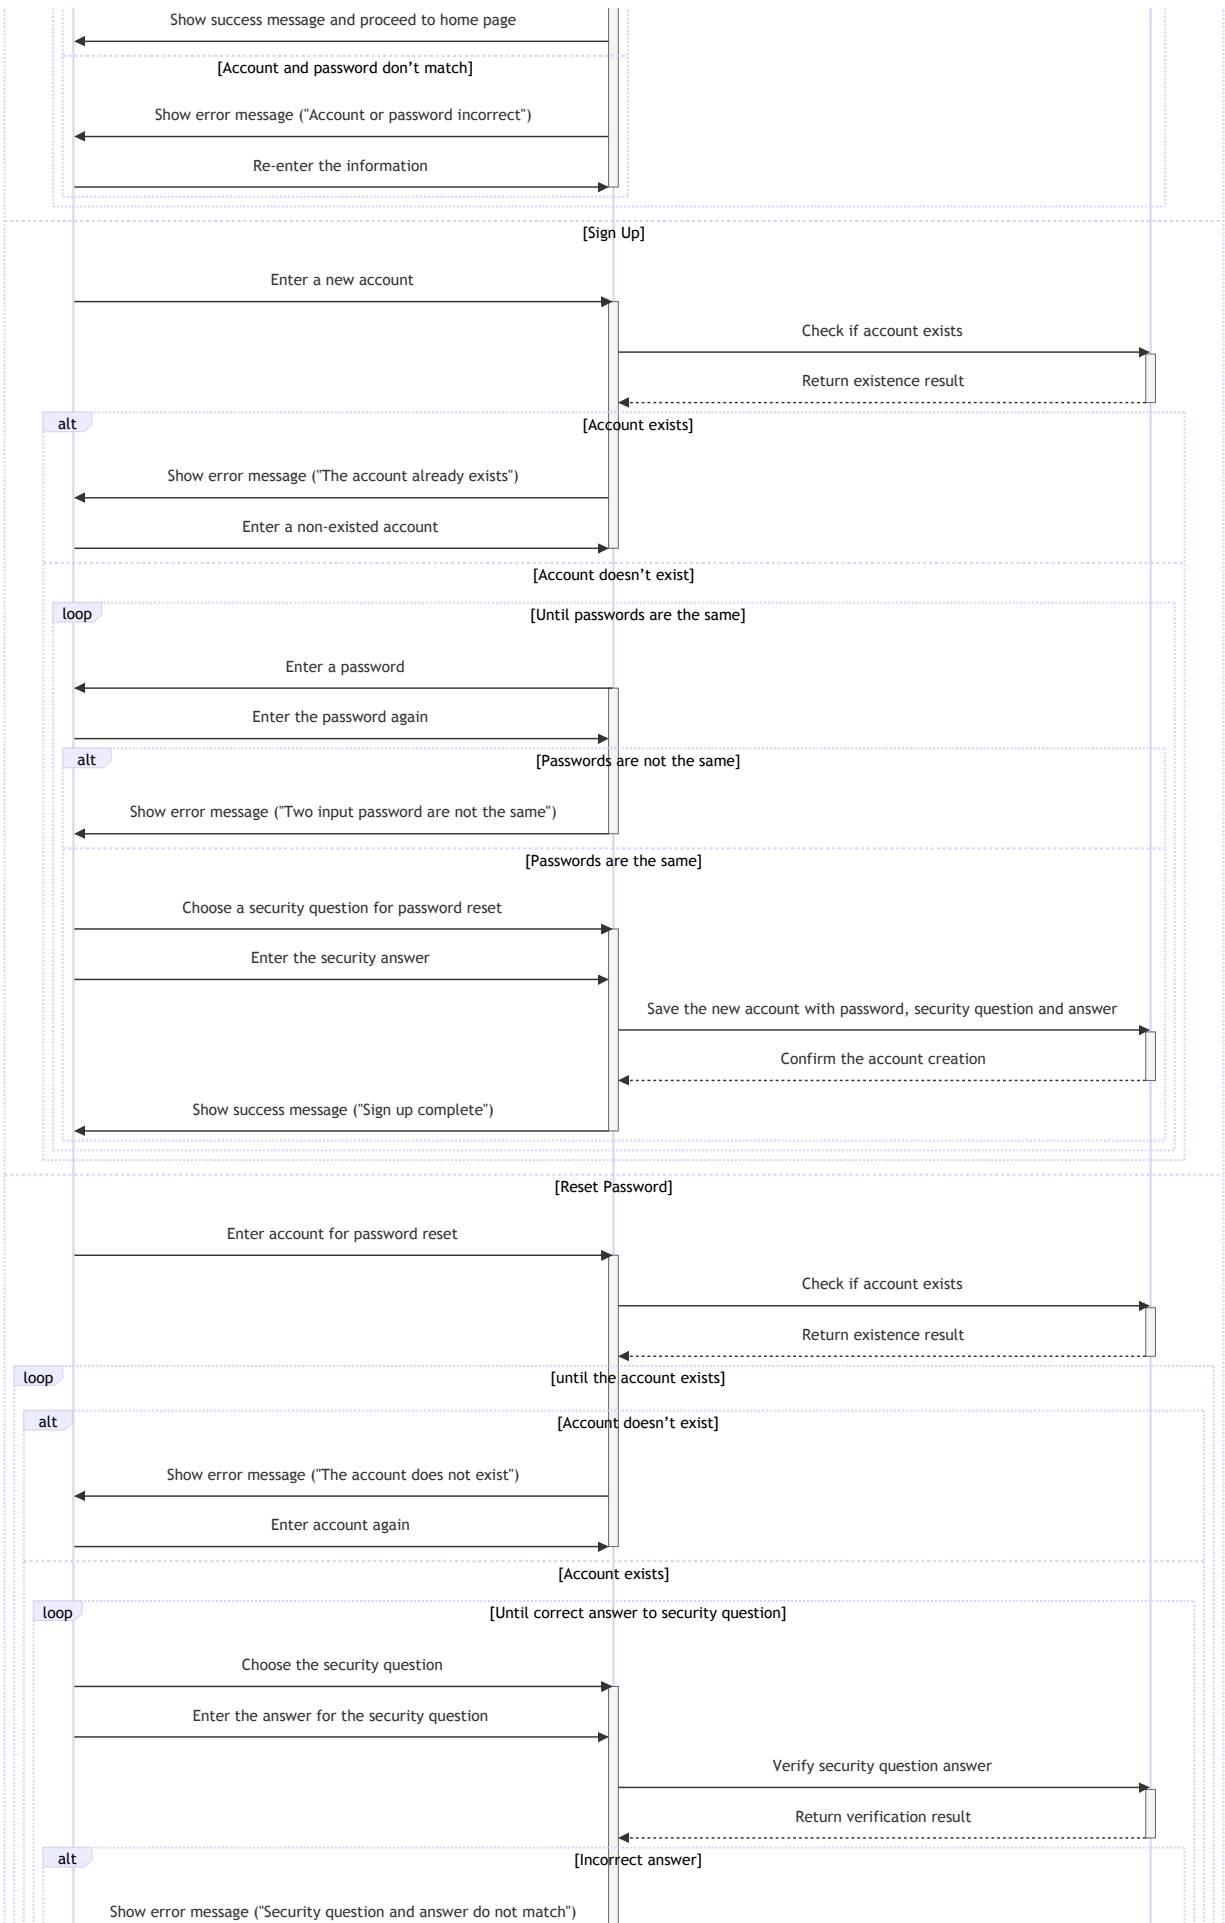

## Sequence Diagram

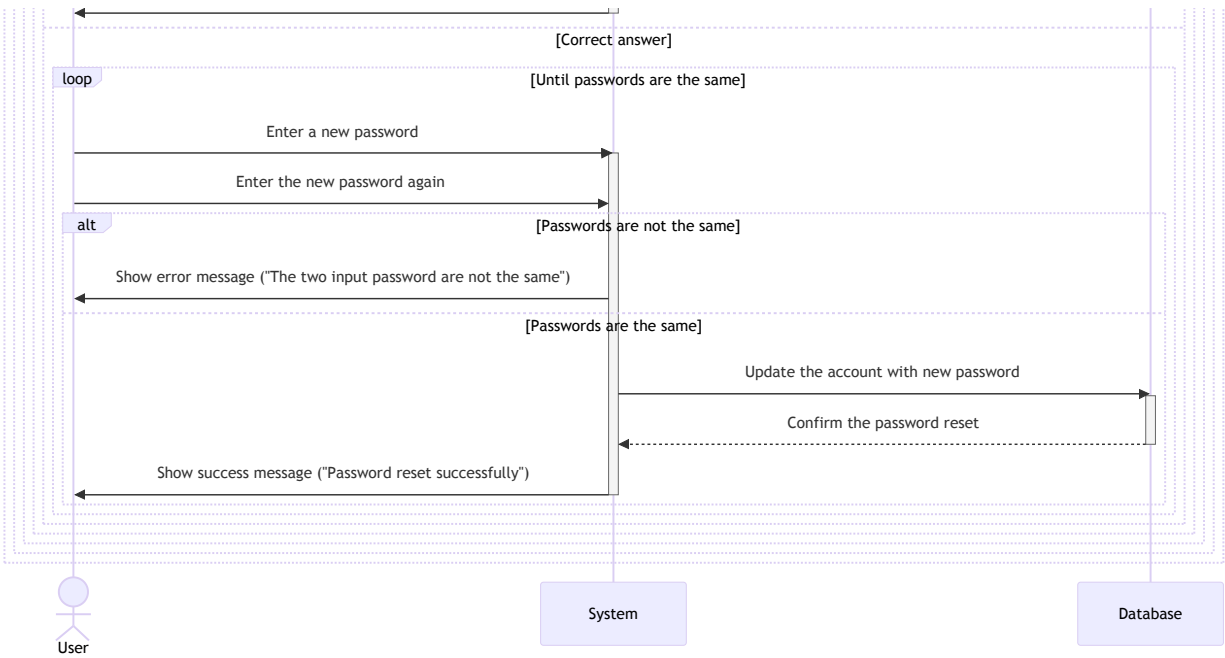

(Zhihao Cao, Zihan Zhou, Changhao Huang)

## Zhihao Cao (view clothing items)

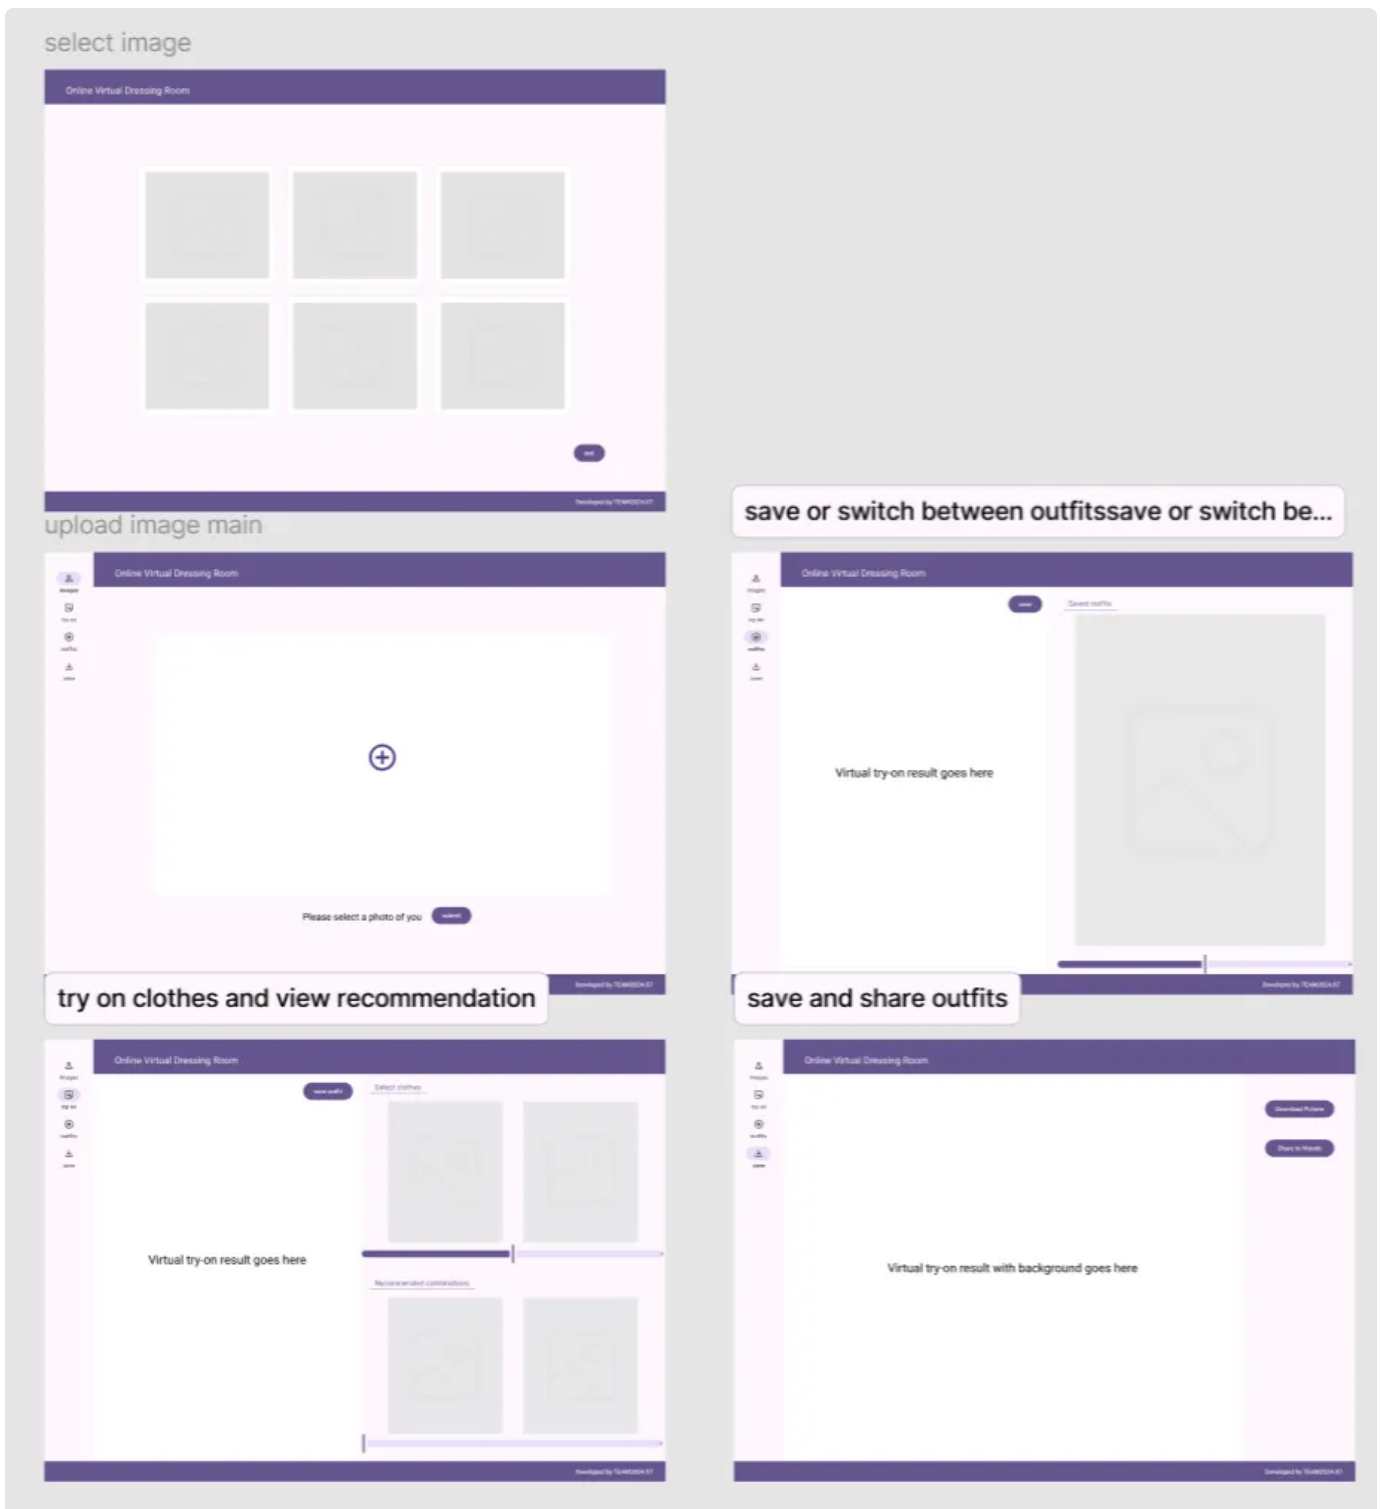

Changhao Huang (Sign in, Sign up and Password reset)

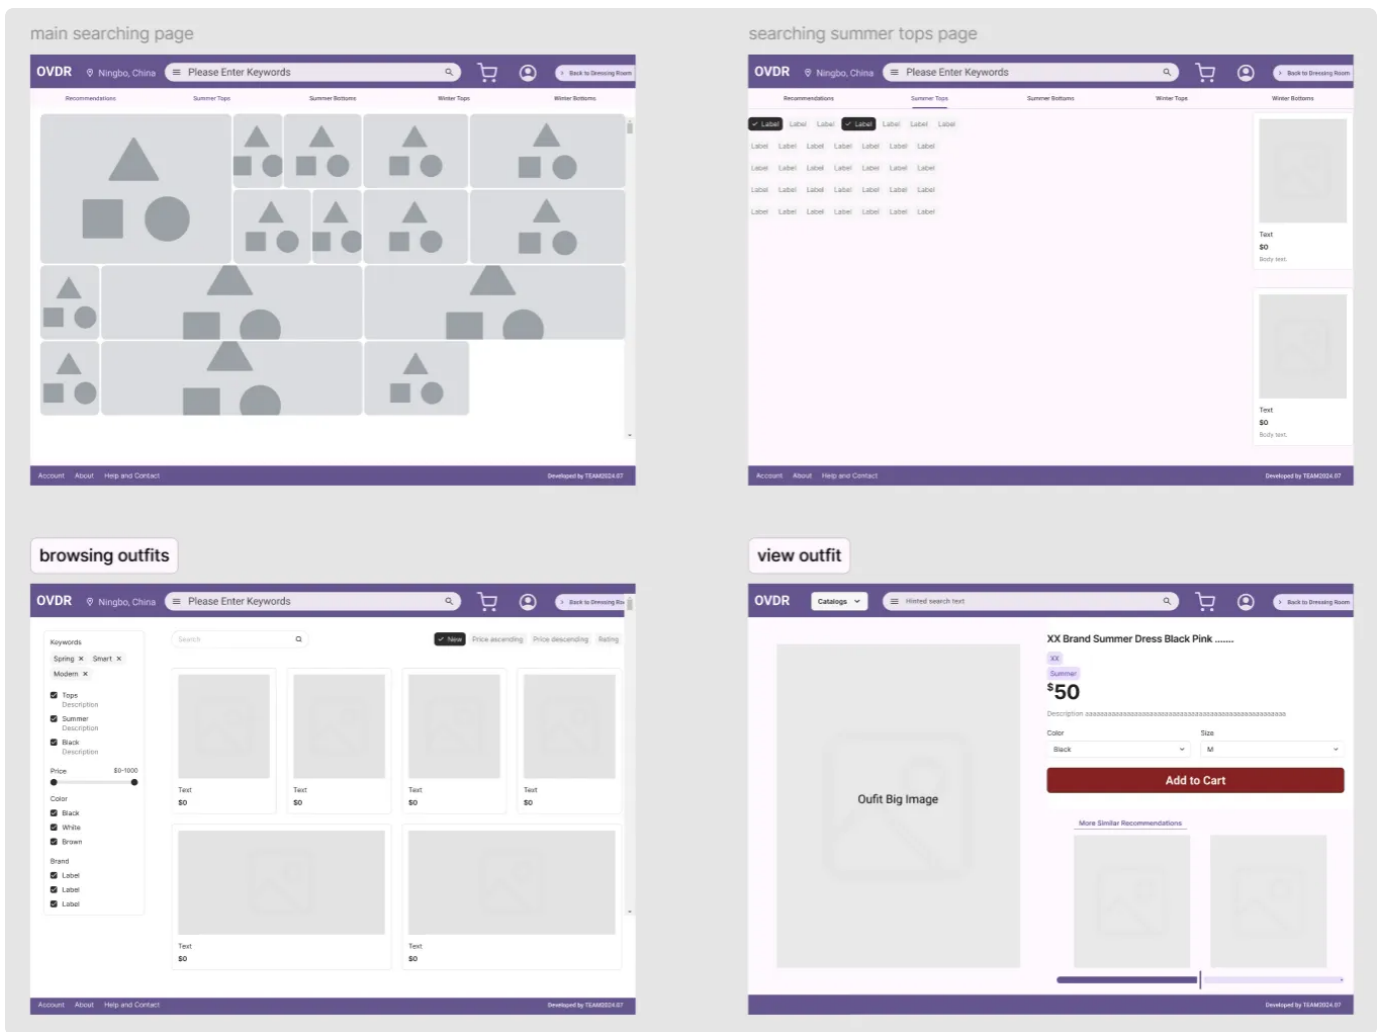

## Prototype (Peini She, Zixin Ding, Jinghao Liu)

<https://www.figma.com/proto/LQUS6de4UhTJhda2CwG3pM/Online-Virtual-Dressing-Room?node-id=759-266&t=pQxtEI2GGP8IacOi-1>

- Try on Page (Unfinished version with interaction)

- Browser (Unfinished version, accessories are harder to find, list the current IDEA in the interface conception and continue to realize it at a later stage)

- Login (Unfinished version)

## Prototype Interface Conception

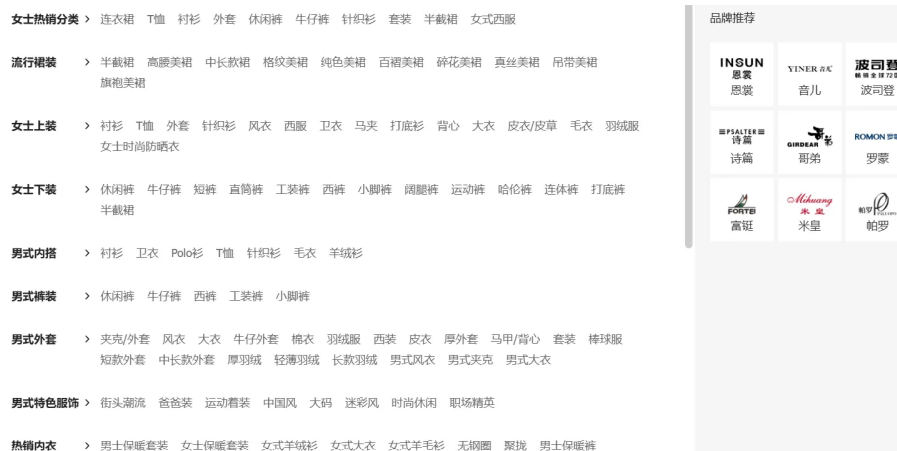

1. Enables seamless navigation between different outfits, searching and trying on clothes
  - Add a page switching tab in the upper right corner (or upper left corner) of the interface to realize the switch between the fitting room and the search interface.

- (To be implemented) Add basic catalog categories to the Outfit Cart in the clothing section of the fitting room to differentiate between basic categories such as tops, bottoms, dresses dressing, etc.
2. (Ding) Keyword (or Label) layout concept for the search interface.
    - a. Simple version (single item choice)

- i. Classification of goods into horizontal and vertical rows and columns, with rows headed “Women's tops, women's bottoms, skirts, men's tops,” etc., listed as a rule, such as women's tops are divided into shirts, T-shirts, etc.
- ii. The item recommendation can be put on the right side (the picture below is for reference)

- iii. Hopefully it's something like clicking on the Catalog button and then a drop down bar appears
- iv. After clicking on a specific item, you will be taken to the interface for picking detailed labels (the image below is for reference, more than one can be selected)

|   |   |
|---|---|
| 品牌  | <input type="checkbox"/> 经典故事 <input type="checkbox"/> 音儿 <input type="checkbox"/> 德玛纳 <input type="checkbox"/> Roey s house <input type="checkbox"/> 斯尔丽<br><input type="checkbox"/> URBAN REVIVO <input type="checkbox"/> 玖姿 <input type="checkbox"/> VERO MODA <input type="checkbox"/> 珂莱蒂尔 <input type="checkbox"/> 晚白<br><input type="checkbox"/> 白鹿语 <input type="checkbox"/> 奢姿 <input type="checkbox"/> 美丽衣橱 <input type="checkbox"/> 粉蓝衣橱 <input type="checkbox"/> 妖精的口袋<br><input type="checkbox"/> BUOUBUOU <input type="checkbox"/> ONLY <input type="checkbox"/> AMII <input type="checkbox"/> 诗篇 <input type="checkbox"/> 生活在左 <input type="checkbox"/> 朗姿 |
| <input type="button" value="确认"/> <input type="button" value="取消"/> |   |

| <input type="button" value="确认"/> <input type="button" value="取消"/> |   |
| 主风格   | 商务通勤    极简风    复古风    文艺风    优雅气质    都市休闲    甜美    国风   |
| 更多 <input type="button" value="+ 多选"/>                              |   |

## Q&A:

1. What does a webcam look like? Is it a code to call the local camera hardware?

I.e. normal webcam, usb-cam is easy to call.

2. How to connect to the school server and in what way?

The database is built locally to improve the interactive experience and display effect.

3. Do we need a role actor like seller or administrator to add new clothes to the database?

Should add an administrator to handle the database

4. “the application will deliver an enhanced online shopping experience.” Do we provide labels such as prices or purchase links in the fitting room?

No purchase related functionality is required.

5. Do we need to use Javascript for the interactive part?

6. what datasets and libraries are needed to complete this project (recommendations)

7. what are the requirements for our website (including minutes) and how do we give them to teachers?

## Undo List

1. 自我决定是否添加未登录浏览

2. try-on生成图片最快耗时需要10–15s, UI需要考虑处理时间

3. API一次只能替换一件衣服, 需要考虑全套换装的流程

4. 可直接调用观看已生成的他人的结果 (公共人物图片)

需规定上传的照片以及拍摄照片符合基本要求 (如正确的物种、合理的姿势, 以减少选择的范围)

5. 针对功能期望的open question改为multiple choice, 提供关键词细化, 与设计用途相关

6. 如果提供相关网站, 希望何种呈现 (功能性), 如图片呈现形式等

7. ★★补全Functional Requirement (软件设计的流程!) ★★

8. Interaction需与Use Case结合实现

9. label需要由图片数据集分类生成

10. 历史浏览信息、历史搭配信息 (均需反映在use case Diagram中)

1. Self-determination of whether to add unregistered views

2. The fastest time needed for try-on to generate images is 10–15s, UI needs to consider the processing time.

3. API can only replace one piece of clothing at a time, need to consider the flow of the full set of dress-ups

4. You can directly call to view the results of other people's generated images (public character

- images). Need to stipulate that the uploaded photos as well as the taken photos meet the basic requirements (e.g., correct species, reasonable poses to reduce the range of choices)
5. Change the open question for functional expectations to multiple choice, providing keyword refinement relevant to the purpose of the design
  6. If a relevant website is provided, what kind of presentation (functionality) is expected, such as the form of image presentation, etc.
  7. ★★★ Completion of Functional Requirement (process of software design!) ★★★
  8. Interaction needs to be realized in conjunction with Use Case.
  9. Label needs to be generated from the image data set.
  10. History of browsing information, history of matching information (all need to be reflected in the use case Diagram)

## Next Week Work and Important Point

### Envisioned in Timeline:

Revise and refine the preliminaries (UML, Prototype, etc.)

Start questionnaire information collection

Find project-related software, websites, datasets

Update website, website maintenance

### Tasks for next week

1. search for related recommendation algorithms (research, environment, trial, understand the underlying algorithms)
2. find public datasets & image dataset crawler
3. captioning (clothing especially, may need training)
4. databases associated with features (account info, keywords, images, history)

## Plan

| Task | Person(s) | Status | DDL | Degree | Note |
|------|-----------|--------|-----|--------|------|
|------|-----------|--------|-----|--------|------|

|                                       |   |        |      |                 |  |
|---------------------------------------|---|--------|------|-----------------|--|
